PROFILE

I'm a Computer Science and Engineering student and presently studying at BRAC University. I'm quite passionate about coding since my school days so I started the basics with C++ and currently learning core Python and JavaScript. As related to my field of study, Machine Learning, AI Development, Cyber Security, and Web Development - these are my points of interest. As a huge tech lover, I have a great affection for newer and updated technologies.

Looking forward to shining bright and bringing some betterment to this beautiful world.
